

StanPro® Adds New Injection Molded Components to Product Offerings

NOVI, Mich. - Jan. 18, 2011 - [StanPro®](#), a division of [Cooper Standard](#), recently launched a new product segment – injection molded components – to its expanding portfolio. The StanPro line of injection molded components is applicable for a wide range of fluid management designs and applications, such as tube, hose and conduit connections, mounting clips and fasteners, as well as a variety of other applications.

The injection molded components family joins the StanPro line that includes other recent product launches including Tape-on Seals and Quick Connects, which were announced in 2010. The new line of injection molded components will be manufactured in the United States at the company's East Tawas, Mich. facility.

“We are excited to broaden StanPro's product offering by taking advantage of Cooper Standard's OEM-proven products and making them available through our StanPro brand,” said John Croft, manager, business development, StanPro. “The addition of our injection molded product line helps to expand our already robust sealing product offering to provide a greater range of customer solutions.”

StanPro's injection molded components are lightweight, cost effective, flexible in configuration and application, easy to assemble, serviceable and complementary to other components, helping minimize the number of design parts. The new line also accommodates various plastic or steel tubing along with a vast array of other applications.

To request product literature, samples or to place an order, please call StanPro's customer service staff at (800) 333-3265.
